

SAFETY DATA SHEET

ALPHA STONE BASE

SECTION 1: identification of the substance / mixture and of the company / undertaking

1.1. Product identifier Product

name : ALPHA STONE BASE

1.2. Relevant identified uses of the substance or mixture and uses advised against

Not applicable.

Use of the Product : Use in accordance with the directions given on the container.

1.3. Information on the supplier of the safety data sheet

Akzo Nobel Coatings SpA Via
Pietro Nenni 14,
28053 Castelletto sopra Ticino,
Tel. +39 0331 916611
Internet: www.sikkens.it

E-mail address of the Responsible person of the safety data sheet : service.clienti@akzonobel.com

1.4 Emergency telephone number

Telephone number : Telephone number: +39 0331 916611 (active 24/7) International AkzoNobel emergency number: +31 71 3086944 (active 24/7)

Version : 1

Date of issue : No previous validation
previous one

ALPHA STONE BASE

SECTION 2: Hazards identification**2.1. Classification of the substance or mixture****Product definition:**Blend**Classification according to EC Regulation No. 1272/2008 [CLP / GHS]**

Eye Dam. 1, H318

Ingredients of unknown toxicity : 0%**Ingredients of unknown ecotoxicity** : 0%

See section 16 for the full text of the hazard statements mentioned above. For more detailed information on health effects and symptoms, see Section 11.

2.2. Label elements Hazard**pictograms**

:

**Warning** : Danger**Hazard statements** : Causes serious eye damage.**Precautionary advice****General**

: Keep out of reach of children. If you need to consult a doctor, have the container or the label of the product available.

Prevention

: Make use of an eye or face protection device. Wash hands thoroughly after use.

Reaction

: IN CASE OF EYE CONTACT: Rinse thoroughly for several minutes. Immediately call a POISON CENTER or doctor.

storage

: Not applicable.

Disposal

: Dispose of the product and container in accordance with local, regional, national, international regulations.

Dangerous ingredients

: calcium dihydroxide

Additional elements of the label

: Not applicable.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain substances, preparations and articles dangerous

: Not applicable.

Special Packaging Obligations**Containers that must be equipped with a child safety lock**

: Not applicable.

Tactile warning of danger

: Not applicable.

2.3. Other dangers**Voluntary element of the label (CEPE)**

: Contains methylisothiazolinone

Other dangers not mentioned in the classification

: None known.

ALPHA STONE BASE

SECTION 3: Composition / information on ingredients

3.2 Mixtures

:Blend

| Product name/ ingredient | Identifiers | % (p / p) | <u>Classification</u> Regulation (EC) n. 1272/2008 [CLP] | Guy |
|-----------------------------|---|-----------|---|---------|
| calcium dihydroxide | REACH #: 01-2119475151-45 CE: 215-137-3 CAS number: 1305-62-0 | ≤5 | Skin Irrit. 2, H315 Eye Dam. 1, H318 STOT SE 3, H335 See section 16 for the full text of the hazard statements mentioned above. | [1] [2] |

There are no additional ingredients which, in the current knowledge of the supplier and in the applicable concentrations, are classified as dangerous for health or the environment, meet the PBT or vPvB criteria or are considered as substances with an equivalent degree of problematicity or substances to which an occupational exposure limit has been assigned and should therefore be reported in this section.

Guy

[1] Substance presenting a health or environmental hazard

[2] Substance for which there are workplace exposure limits

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if known, are listed in section 8.

SECTION 4: first aid measures

4.1. Description of first aid measures General

- : If in doubt or if symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. If the victim is unconscious, have him assume the safety position and call the doctor.

Eye contact

- : Check for contact lenses and if so, remove them. IMMEDIATELY flush eyes with running water for at least 15 minutes, holding eyelids apart. Consult a physician immediately.

Inhalation

- : Bring to fresh air. Keep the person warm and at rest. In case of lack of breathing, irregular breathing or respiratory arrest, give artificial respiration or have oxygen administered by trained personnel.

Skin contact

- : Remove contaminated clothing and shoes. Wash thoroughly with soap and water or use an effective skin cleanser. DO NOT use solvents or thinners.

Ingestion

- : If swallowed, seek medical advice immediately and show the container or label. Keep the person warm and at rest. DO NOT induce vomiting.

Protection of rescuers

- : No action shall be taken involving any personal risk or without suitable training. If fumes are still suspected, wear a mask or respirator. Performing mouth-to-mouth resuscitation can be dangerous for the person helping. Remove the contaminated garment after washing it thoroughly with water or using gloves.

4.2. Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. The mixture was evaluated following the conventional method of the CLP regulation (EC) No. 1272/2008 and is consequently classified according to its toxicological properties. For more details, see Sections 2 and 3.

Exposure to solvent vapor concentrations above the pre-established occupational limit can be harmful to health, causing irritation of the mucous membranes and respiratory tract with adverse effects on the kidneys, liver and central nervous system. Symptoms include headache, dizziness and wobbling, fatigue, muscle weakness, sleepiness and in extreme cases loss of consciousness.

ALPHA STONE BASE**SECTION 4: first aid measures**

Solvents may cause some of the aforementioned effects via skin absorption. Repeated or prolonged contact with the mixture can result in the removal of natural skin fat, resulting in non-allergic contact dermatitis and absorption through the skin.

Contact of the liquid with the eyes can cause irritation and reversible damage.

Ingestion can cause nausea, diarrhea and vomiting.

If known, the delayed and immediate effects, as well as the chronic effects of the components deriving from short and long-term exposure, by the oral and dermal route, by inhalation and by contact with the eyes, are taken into account.

4.3. Indication of any immediate medical attention and special treatment needed Notes to physician

: Treat symptomatically. If large quantities are ingested or inhaled, contact a poison control center immediately.

Specific treatments

: No specific treatment.

See Section 11 for Toxicological Information (Section 11)

SECTION 5: Firefighting measures**5.1. Extinguishing media**

Suitable extinguishing media :Recommended: alcohol resistant foam,CO₂,powders, water spray.

Unsuitable extinguishing media :Do not use full jet water.

5.2. Special hazards arising from the substance or mixture

Hazards arising from the substance or mixture : Any fires develop thick black smoke. Exposure to decomposition products can be dangerous to health.

Dangerous products from thermal decomposition : Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, nitrogen oxides.

5.3. Recommendations for firefighters

Special actions of protection for firefighters : Cool closed containers exposed to flames with water. Do not channel the products of a fire into drains or water courses.

Special protective equipment for personnel fire fighting : The use of a self-contained breathing apparatus may be required.

SECTION 6: Accidental release measures**6.1. Personal precautions, protective equipment and emergency procedures**

For those who do not intervene directly : Remove any sources of ignition and ventilate the room. Avoid breathing vapors or mists. Consult the protective measures listed in sections 7 and 8.

For those who intervene directly : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency service operators".

6.2. Environmental precautions: Do not dispose of the product in the sewer system and water courses. In case of contamination by the product of lakes, rivers or waste water, inform the competent authorities in accordance with current legislation.

6.3. Methods and materials for: containment and for Contain and collect any spills with non-combustible absorbent material, such as sand, earth, vermiculite, diatomite and dispose of the product in a container in accordance with current legislation (see Section 13). Clean, preferably using a detergent. Avoid using solvents.

ALPHA STONE BASE

SECTION 6: Accidental release measures**6.4. Reference to other sections**

: For emergency telephone numbers, see Section 1.
See Section 8 for information on appropriate personal protective equipment.

For more information on waste treatment, refer to Section 13.

SECTION 7: handling and storage

The information contained in this section contains general information and warnings. Refer to the list of Identified Uses in Section 1 for specific information available provided in the exposure scenario (s).

7.1 Precautions for safe handling

: Prevent the development of flammable or explosive vapor concentrations in the air o that exceed the occupational exposure limits.
Also, use the product only in rooms from which all naked flame lamps and other sources of ignition have been removed. Protect electrical equipment according to appropriate standards.
The mixture can become electrostatically charged: always use ground connections when transferring it from one container to another.
Operators must wear antistatic shoes and clothing, while floors must be conductive.
Keep away from sources of heat, sparks and flames. Do not use any tools that cause sparks.
Avoid contact with eyes and skin. Avoid inhalation of dust, particulates, aerosols or mists deriving from the application of this mixture. Avoid inhalation of dust deriving from sandblasting.
It is forbidden to eat, drink and smoke in areas where the material is handled, stored or treated.
Put on appropriate personal protective equipment (see Section 8).
Never empty the product by subjecting it to pressure. The container is not pressurized.
Always keep the material in the original container.
Observe the provisions of the laws relating to health and safety in the workplace.

Do not dispose of the product in the sewer system and water courses. **Information on fire and explosion protection**

Vapors are heavier than air and can spread over floors. Vapors can form explosive mixtures with air.

7.2 Conditions for safe storage, including any incompatibilities

Arrange for storage in compliance with current legislation. **Notes on shared storage**

Keep away from: oxidizing agents, strong alkalis, strong acids. **Additional information on storage conditions**

Observe the precautions on the label. Store in a dry, cool and well-ventilated area. Keep away from heat and direct sunlight. Keep away from sources of ignition. Smoking prohibited. Access prohibited to outsiders. Open containers must be carefully resealed and kept straight to prevent accidental product spillage.

7.3 Specific end uses**Warnings**

: Unavailable.

Specific guidelines for the industrial sector

: Unavailable.

ALPHA STONE BASE

SECTION 8: Exposure controls / personal protection

The information contained in this section contains general information and warnings. The information provided refers to the typical uses envisaged for the product. Additional measures may be needed for bulk processing or other uses that could significantly increase worker exposure or emissions to the environment.

8.1 Control parametersOccupational exposure limits

| Name of the product / ingredient | Exposure limit values |
|----------------------------------|--|
| calcium dihydroxide | EU OEL (Europe, 12/2009). Notes: list of indicative occupational exposure limit values TWA: 5 mg / m ³ 8 hours. |

**Monitoring Procedures:
Recommended**

If this product contains ingredients with exposure limits, personal, workplace atmosphere and biological monitoring may be required to determine the effectiveness of ventilation or other control measures and / or the need to use protective equipment respiratory. Refer to the monitoring standards, such as the following: European standard EN 689 (Atmosphere in the workplace - Guidance on the assessment of exposure by inhalation to chemical compounds for the purpose of comparison with limit values and measurement strategy) Standard European EN 14042 (Atmospheres in the workplace - Guide to the application and use of procedures for assessing exposure to chemical and biological agents) European standard EN 482 (Atmospheres in

DNEL / DMEL

No DNEL / DMEL available.

PNEC

No PNECs available.

8.2 Exposure controls Appropriate**engineering controls**

- : Provide adequate ventilation. When reasonably practicable, this can be achieved through replacement ventilation and good general aspiration. If it is impossible to keep the concentrations of solvent vapors and powders below the occupational exposure limit, wear suitable means of respiratory protection.

Individual protection measures**Hygiene measures**

- : Before eating, smoking and using the lavatory and at the end of the working period, wash your hands, arms and face thoroughly after handling chemicals. Appropriate techniques should be used to remove potentially contaminated clothing. Wash the contaminated garments before reusing them. Make sure that the eyewash stations and emergency showers are close to the place of use.

Eye / face protection

- : Use protective goggles to prevent accidental penetration of liquids into the eyes.

Skin protectionHand protection**Gloves**

- : Recommended gloves are product containing common solvents. When frequent or prolonged contact is expected, the use of class 6 protective gloves is recommended (permeation time greater than 480 minutes according to EN 3740-3). In the case of occasional contact, the use of class 2 protective gloves is recommended (breakthrough time greater than 2 hours according to EN 3740-3)

NB. The choice of gloves must also take into account other specific processes carried out in the workplace, for example the presence of other chemicals, physical risks and possible allergic reactions to the material used for the production of the glove, therefore consult your trusted supplier.

ALPHA STONE BASE

SECTION 8: Exposure controls / personal protection

The user must check that the final choice of type of glove for handling this product is the most appropriate and takes into account the particular conditions of use, as specified in the user's risk assessment.

Gloves must be replaced regularly and whenever there are signs of damage to the material they are made of.

Always ensure that gloves are free from defects and that they are stored and used correctly.

- Body protection device** : Personnel must wear antistatic clothing made of natural fiber or synthetic fiber resistant to high temperatures.
- Other devices of skin protection** : Choose appropriate footwear and any additional skin protection measures based on the activity being carried out and the inherent risks. Such choices must be approved by a specialist before handling this product.
- Respiratory protection** : If workers are exposed to concentrations above the exposure limit, use appropriate, certified respirators.

Treatments such as sanding, sandblasting or flame removal, etc., of the paint layers, can generate dangerous dust and / or fumes. Wet sanding should be used wherever possible. Respiratory protection in case of dust or spray mist formation. (particulate filter EN143 type P2) Respiratory protection in case of vapor formation. (half mask with A2-P2 combined filter up to concentrations of 0.5% by volume.)

- Checks of the exhibition environmental** : Do not dispose of the product in the sewer system and water courses.

SECTION 9: physical and chemical properties**9.1. Information on basic physical and chemical properties_****Appearance**

- Physical state** : Liquid.
- Color** : Miscellaneous: See
- Odor** : label. Unavailable.
- Odor threshold** : Unavailable.
- pH** : Unavailable.
- Melting point / freezing point** : Unavailable.
- Initial boiling point and boiling range** : 100 ° C
- Flash point** : Not applicable.
- Evaporation rate** : Unavailable.
- Upper / lower flammability or explosive limits** : Unavailable.
- Vapor pressure** : Unavailable.
- Vapor density** : Unavailable.
- Relative density** : 1.837
- Solubility (ies) Solubility in water** : Easily soluble in the following materials: cold water.
: Unavailable.
- Partition coefficient: octanol / water** : Unavailable.
- Temperature of self-ignition** : Unavailable.
- Temperature of decomposition** : Unavailable.

ALPHA STONE BASE**SECTION 9: physical and chemical properties**

- Viscosity** : Kinematic (room temperature): 16 cm²/ s Not
- Explosive properties** : available.
- Oxidizing properties** : Unavailable.

9.2. Other information No

additional information.

SECTION 10: stability and reactivity

- 10.1. Reactivity** : No specific test data related to reactivity available for this product or its ingredients.
- 10.2. Chemical stability** : The product is stable under the recommended handling and storage conditions (see section 7).
- 10.3. Possibility of reactions:** Under normal conditions of storage and use, hazardous reactions will not occur. **dangerous**
- 10.4. Conditions to avoid:** If exposed to high temperatures it can produce dangerous decomposition products.
- 10.5. Incompatible materials:** To avoid strong exothermic reactions, keep away from the following materials: oxidizing agents, strong alkalis, strong acids.
- 10.6. Products of dangerous decomposition** : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: toxicological information**11.1. Information on toxicological effects**

There are no data available on the mixture itself. The mixture was evaluated following the conventional method of the CLP regulation (EC) No. 1272/2008 and is consequently classified according to its toxicological properties. For more details, see Sections 2 and 3.

Exposure to solvent vapor concentrations above the pre-established occupational limit can be harmful to health, causing irritation of the mucous membranes and respiratory tract with adverse effects on the kidneys, liver and central nervous system. Symptoms include headache, dizziness and wobbling, fatigue, muscle weakness, sleepiness and in extreme cases loss of consciousness.

Solvents may cause some of the aforementioned effects via skin absorption. Repeated or prolonged contact with the mixture can result in the removal of natural skin fat, resulting in non-allergic contact dermatitis and absorption through the skin.

Contact of the liquid with the eyes can cause irritation and reversible damage.

Ingestion can cause nausea, diarrhea and vomiting.

If known, the delayed and immediate effects, as well as the chronic effects of the components deriving from short and long-term exposure, by the oral and dermal route, by inhalation and by contact with the eyes, are taken into account.

ALPHA STONE BASE

SECTION 13: Disposal considerations

The information contained in this section contains general information and warnings. Refer to the list of Identified Uses in Section 1 for specific information available provided in the exposure scenario (s).

13.1 Waste treatment methods**Product****Methods of disposal**

- : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products must always be carried out in accordance with the legal indications on environmental protection and waste disposal and the requirements of each relevant local authority. Dispose of surplus and non-recyclable products through an authorized waste disposal company. Untreated waste should not be disposed of in the sewer system unless it fully complies with the requirements of each entity and legislation.

Hazardous waste

- : The classification of the product could meet the criteria for hazardous waste.

Considerations on the disposal

- : Do not dispose of the product in the sewer system and water courses. Dispose of in accordance with applicable regional, state and local laws. If this product is mixed with other wastes, the original refused code can no longer be applied and an appropriate code will need to be assigned. For more information, contact the responsible waste disposal agency.

Packing**Methods of disposal**

- : The generation of waste should be avoided or minimized wherever possible. Waste packaging must be recycled. Incineration or landfilling should only be considered when recycling is not practicable.

Considerations on the disposal

- : Using the information provided in this safety data sheet, contact the appropriate waste disposal authority for guidance on the classification of empty containers. Empty containers must be discarded or reprocessed. Dispose of containers contaminated by the product in accordance with local or national regulatory requirements.

Special precautions

- : Do not dispose of the product and the container except with due precautions. Care should be taken when handling emptied containers that have not been cleaned or rinsed. Empty containers or liners can retain product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

SECTION 14: Transport information

The information pertaining to IATA and ADN is considered irrelevant as the material is not packaged in the correct approved packaging required by these modes of transport.

| | ADR | IMDG |
